Frequently Asked Questions

Agent Analytics

- My site is hosted on Shopify / Squarespace / WP / Kinsta / Liquid / etc. How can I connect Agent Analytics?
- Do I need technical expertise and access to my site's code / CDN to configure Agent Analytics?
- How do I know if Agent Analytics is working?
- I used the Cloudfront integration via Firehose. Why am I not seeing any data?
- I used the Cloudflare integration via Logpush. Why is there no HTTP destination option at Step 2 / no ClientRequestHost filter at step 4?
- I registered two (or more) domains with Agent Analytics. I see one domain by default. How do I see the other domains?

Google Analytics

- What domain should I use when registering my site with Google Analytics?
- Why can't I click on the Overview / Bots / Pages / Logs tabs?
- My team registered GA4 already. Why can't I see any data?
- I have configured both GA4 and Agent Analytics. Why am I seeing different data in the Referrals tab?
