Overview

Getting Started

Set up Agent Analytics in just a few clicks

Overview

Agent Analytics is Profound’s powerful tracking solution that provides comprehensive insights into user interactions on your website. In this guide, you’ll learn how to quickly add and configure a domain for tracking, allowing you to monitor traffic patterns, user behavior, and performance metrics.

Setting up Agent Analytics takes just a few minutes and requires minimal technical expertise. Once configured, you’ll gain access to an intuitive dashboard that displays real-time data, helping you make informed decisions to optimize your website’s performance and enhance the user experience.

Prerequisites

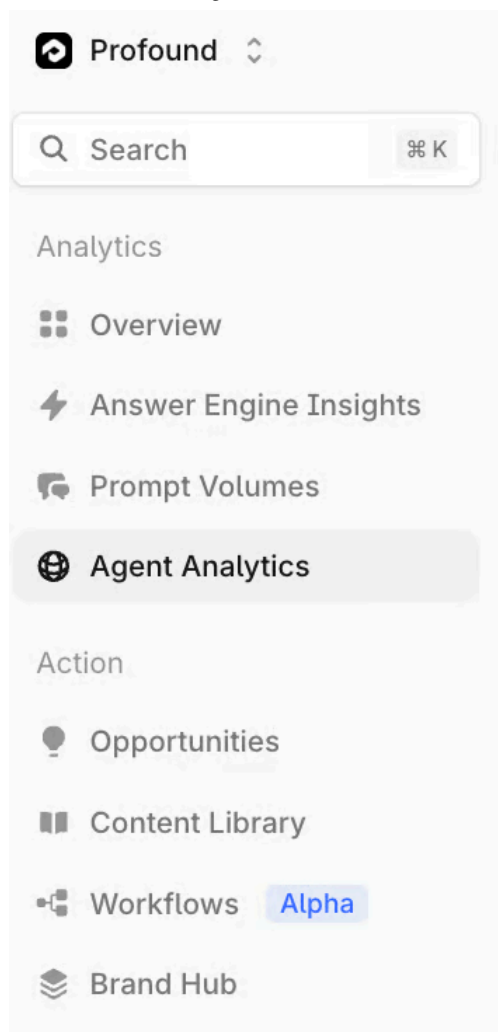

- A Profound account
- Access to your domain’s hosting provider (e.g. Cloudflare, Vercel, etc.)

Onboarding

1

Step 1

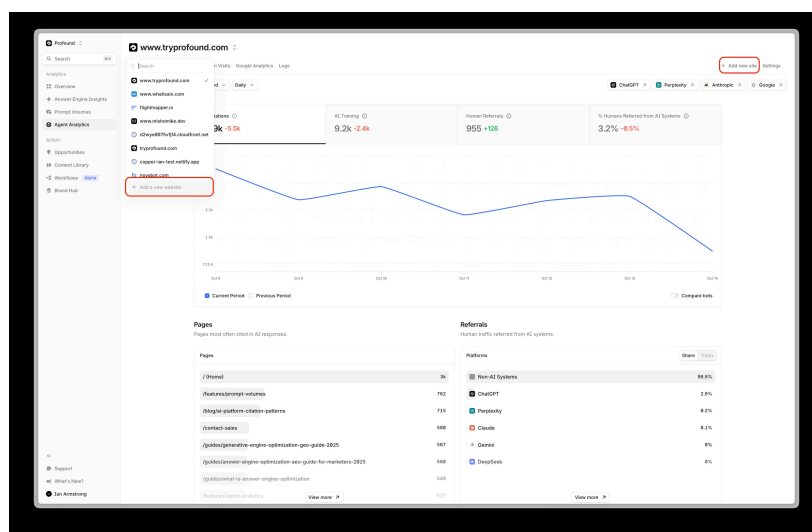

Navigate to the Agent Analytics tab on the left sidebar.

2 Step 2

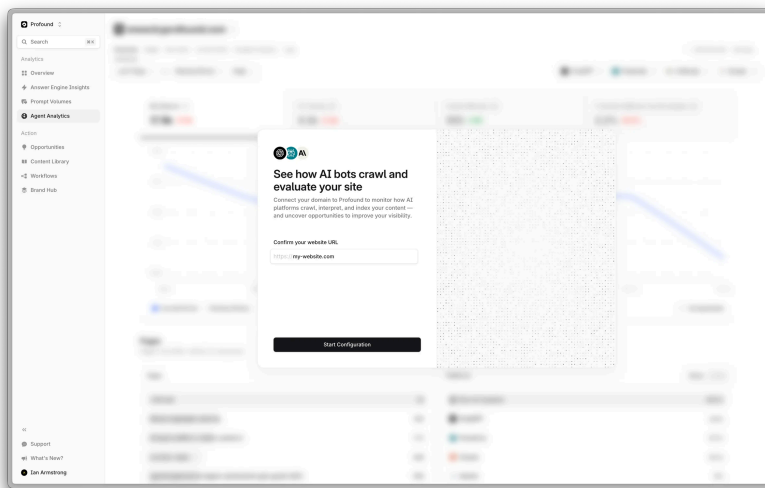

i If you are configuring your first domain, you can skip this step.

Click on your existing domain near the top and select **+ Add a new website** from the dropdown menu or use the button in the top right.

3 Step 3

You will then see the following window. Use the input field to enter the apex domain you want to track.

4 Step 4

Profound will attempt to automatically detect your domain's hosting provider. Ensure the correct provider is selected before continuing.

5 Step 5

To continue, select the appropriate provider and follow the setup guide.

Cloudflare (Worker)

Connect your Profound account to your Cloudflare account with a lightweight worker

Cloudflare (Logpush)

Connect your Profound account to your Cloudflare account with Logpush

Vercel (Connectable Account)

Integrate your Vercel account with Agent Analytics in just a few clicks

Amazon CloudFront

Use Amazon Data Firehose to deliver real-time logs to Profound

Fastly

Connect your Fastly traffic to Profound with a Custom HTTPS Endpoint

Netlify

Connect your Netlify traffic to Profound with Log Drains

Akamai

Connect your Akamai traffic to Profound with DataStream2

Google Cloud CDN

Connect your Google Cloud CDN traffic to Profound with a log sink

WordPress Plugin

Use the WordPress plugin to send request logs to Profound

**Custom Integration**

Build your own custom integration with standardized log drain formats
