What this page shows

Every time a LLM platform (ChatGPT w/ browsing, Google AI Overviews, Google AI Mode, Bing Copilot, Perplexity, etc.) mentions your **brand name**, it attaches a redirection pointing to the web pages it used. This report surfaces *those* parent domains so you can see:

- **Who influences AI answers about you** – which blogs, news sites, docs, or forums shape what large-language models (LLMs) say.
- **How that pool is changing** – new domains joining, old ones dropping off, and overall growth or churn.
- **Where to act** – domains that deserve content updates, partnership/content outreach, or PR because they already rank as trusted sources.

Inclusion rule
A domain appears only when (1) a page on that domain contains your brand name and (2) that page is explicitly cited in at least one tracked AI answer inside your selected date range.

Metrics bar (top of page)

Metric	Why it matters
Total Domains	Unique sites cited for your brand in the period. A quick pulse on overall reach.
New Domains	Sites that started citing you <i>for the first time</i> this period – momentum indicator.

Issues

Citations: Domains Mentioning me(User's Brand)

Metric	Why it matters
Domains Lost	Sites that cited you last period but not this one – potential visibility drop.
Growth %	Net gain of citing sites vs previous period.
Churn %	Portion of last period's sites that disappeared. High churn flags attrition to investigate.

Total domains 287 + 9	New domains 85 29.6% growth rate	Domains lost 76 26.5% churn rate
-----------------------------	--	--

Use the **date-range picker** to switch periods and the **"Compare to previous"** toggle to activate growth/churn columns.

All referring domains

The **All referring domains** panel (left column of the page) is the master list of every external **domain** that meets the inclusion rule for your selected date range.

Cited domain	DR	Source type	No. of answers	Pages	Platform
thedigitalprojectmanager.com	77	Third party	60	43	Google
zapier.com	91	Third party	49	9	Google

project-management.com	72	Third party	19	2	Google

Column	Description
Domain	Root site that hosted the mentioning page (e.g. <i>wikipedia.org</i> , <i>productivity-blog.com</i>). Click to open the <i>All referring webpages</i> view scoped to this domain.
No. of asnwers	Raw count of times your brand name appears across all qualifying pages on the domain. Helpful to spot large sites that mention you frequently but may not always get cited.
Page Mentions	Number of times your brand name appears on that single page . Useful for spotting comprehensive guides vs fleeting mentions.
AI Platform (optional column)	When you filter by a specific assistant, this column shows where the citation occurred (e.g., Google SGE, Bing).

What is the best project management software?	20
8 best light project management software tools	9
The best small business project management software Zapier	9
The best AI project management tools in 2025	9
The 4 best AI project management tools in 2025 Zapier	9
The 4 best AI project management tools in 2025 Zapier	9

1. Click a page row to inspect the actual AI answers citing it (full answer log opens in the main panel).
2. Use View full report for a wider workspace with additional columns (first cited, last cited, co-sources).
3. Download to export the per-page data and prioritize updates with your marketing team.

Pages

Click the value in the Pages column (total number of individual pages from that domain mentioning your brand).

1. Click a page row to inspect the actual AI answers citing it (full answer log opens in the main panel).
2. Use View full report for a wider workspace with additional columns (first cited, last cited, co-sources).
3. Download to export the per-page data and prioritize updates with your content team.

Tips

- Sort by **Sure** to reveal one-stop authoritative domains.
- Sort by **LastSeen** to confirm the freshest sources still active in AI answers.
- Filter by AI platform to see which assistants prefer which domains.

All referring webpages

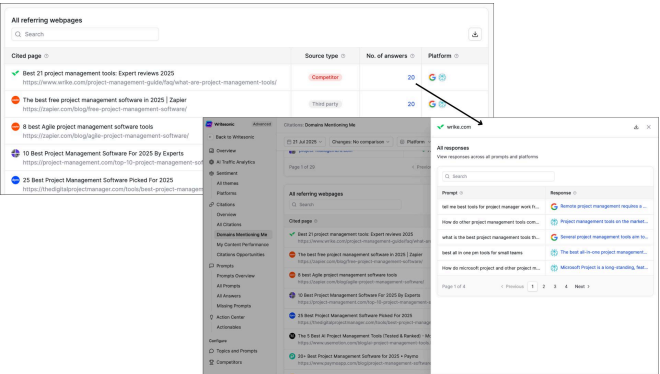

Clicking any domain (or choosing the **All referring webpages** tab) drills down one level deeper to show individual URLs that AI cited.

Column	Description
Page URL / Title	Direct link to the exact web page the AI footnote pointed to. Hover to preview; click to open in new tab.
No. of asnwers	Raw count of times your brand name appears across all qualifying pages on the domain. Helpful to spot large sites that mention you frequently but may not always get cited.
AI Platform (optional column)	When you filter by a specific assistant, this column shows where the citation occurred (e.g., Google SGE, Bing).

Next steps:

No. of answers

1. Click a page row to inspect the actual AI answers citing it (full answer log opens in the main panel).
2. Use View full report for a wider workspace with additional columns (first cited, last cited, co-sources).
3. Download to export the per-page data and prioritize updates with your content team.

How to use it

- Identify **high-Sure pages** – they single-handedly inform AI answers. Keep them up-to-date or negotiate edits if third-party.

FAQ (quick reference)

Citations: Domains Mentioning me(User's Brand)

Does every backlink show up here?

No. Only pages that AI assistants actually cite make the list. Plain backlinks without AI citations live in the *Backlinks* report.

How fast does the list update?

We refresh citation logs daily. New mentions can appear within 24 h of an AI answer surfacing publicly.

Why is my own domain missing?

If your site isn't cited, check that pages use clear, factual language and structured data (FAQ, HowTo, schema.org) so AIs can trust and attribute them.

Use this report weekly to make sure trusted, accurate voices represent your brand – and to proactively grow new ones.
